

Krono[®] Original

The right cleaning care for your laminate flooring

Learn how to properly care for your laminate flooring:

The high quality laminate flooring from Krono Original[®] has a life span over several decades. To ensure that your laminate flooring looks like new for as a long as possible, please take note of the following care instructions:

At the basic level, [laminate flooring](#) is extremely durable and easy to care for. Small stains can be removed quickly and easily with just a damp cloth.

- In high-traffic areas with lots of dirt, such as entryways, mats will help to protect against abrasions.
- Furniture legs should be protected with felt pads to guard against scratching. Note that you can void your warranty should you not use felt pads.
- Office chairs with wheels should use class W, soft castors.
- Standing water should be avoided at all costs. Take extra caution in areas with flowerpots, vases, and near water faucets.
- When cleaning, make sure the cloth is damp, not soaking wet.
- If you use any cleaning agents while cleansing the floor, make sure that all residues are removed.

The right cleaner for your Krono Original[®] laminate flooring

Please never use cleaning agents that contain wax or oil. These materials cannot penetrate the [surface](#) of the laminate flooring forming a film that attracts dirt like a magnet. For regular [cleaning](#), we recommend the Krono Original[®] laminate cleaner.
